Dear Sir or Madam

DAWN OF A NEW ERA IN METERING

We are pleased to advise you of our change of name to **Invensys Metering Systems AG Hannover** from H. Meinecke AG. This takes effect from 2 April.

Invensys Metering Systems is the brand new name that will be adopted by us and our sister company Spanner-Pollux from 2 April 2002. This development brings the strength of the Invensys name to yet another major business sector and marks the latest stage in the reinforcement of the European water metering business. We have been part of Invensys since 1997 as part of the Metering Systems Group, leaders in the delivery of water metering systems and solutions with business operations world-wide. We will continue to operate from facilities in Hannover, supplying you with advanced bulk meters, systems technology and full service support.

You will start to see our new product styles and designs over the coming weeks and months and the Invensys name will eventually appear on everything we produce. We look forward to discussing these exciting new developments with you when we next meet. In the meantime, do not hesitate to call us if you have any questions.

With best regards
Harald Tiemann
Director Sales

Dear Sir,

we are pleased to inform you that at close of business Wednesday 17th December 2003 a private equity firm managed by the Jordan Company, L.P. acquired our complete Division Invensys Metering Systems from our former owners, Invensys PLC.

As a result of this divestment we will change our name and we are informing you that our new name will be

Sensus Metering Systems

As you will see, this is a name change only which demonstrates continuity in our commitment to supply premium metering systems globally.

We will now register the name and brand across the world. We will also create legal entities to ensure a smooth transition to our new name but this will not affect our support to your business. For the short while we will trade with our existing name with a target go-live date of February 2004.

After completion of the legal and commercial duties we will contact you again to ensure you have the latest details available.

The step to become Sensus Metering Systems is well received across our company. The development towards an independent group will allow us to strengthen our portfolio offerings in the future, to ensure we react to your demands with innovations and consolidate our position as market leader for metering systems supply across the world.

More important to you though is to be safe in the knowledge that our watch words are still – BUSINESS AS USUAL!

Please feel free to call me if you would like any further information or clarification.

With best regards

Klaus Gröbl
